# the very best in education

Early Childhood Education utilizes a child-centered, emergent curriculum as its approach to early learning. The curriculum is based on developmentally appropriate practice focused on skill development in all five domains of child development through a well-rounded methodology focused on school readiness.

These include social, emotional, cognitive, language, literacy, adaptive, self-help, and physical areas of development. Aligned with Arizona Department of Education Early Learning Standards, Phoenix Day is committed to offering research-based best practices in this dual language program.

Phoenix Day pursues meaningful goals in serving the community:

- **Provide top quality education to children in Phoenix**
- **Promote lifelong learning and healthy living**
- **Identify and mitigate barriers to learning prior to kindergarten**
- **Ensure all children enter kindergarten with the cognitive, language, social, emotional, self-help, and physical skills necessary for school success**
